

## Turfgrass Maintenance Foreman

Exterior Image, Inc. is a full service landscape company that offers design, installation and maintenance services in Annapolis and the surrounding areas. We pride ourselves in delivering the quality work that is expected of us as a "high-end" design/build company. Our goal is to maintain our customers' landscapes above industry standards.

This is a key role within Exterior Image, Inc. While supervising a maintenance crew, you will be tasked with maintaining an assigned route and performing general turf maintenance duties to exceed client expectations. In addition to routine mowing, you will be required to apply fertilizer, pesticide and perform aerating and overseeding for assigned clients. Experience in turf grass management is necessary in order to maintain the highest quality and standards. You will be expected to be able to identify major weeds, insects and diseases and assess the damage they cause. There is room for growth for the right individual as we are currently expanding into new areas. Currently this is a full time, seasonal position but could be a year round position for the right individual. Experience with lighting and irrigation would be a major asset.
